

RABBIA BATOOL

Junior Full Stack Developer | React / Next.js | Node.js | REST APIs | SQL & NoSQL
+92 314 6222415 | rabbiabatool875@gmail.com | [GitHub: github.com/rabbiabatool](https://github.com/rabbiabatool) | [LinkedIn: linkedin.com/in/rabbia-batool](https://www.linkedin.com/in/rabbia-batool)

PROFESSIONAL SUMMARY

Software Engineering graduate (UET Lahore, 2026) with hands-on full-stack experience from an internship at Systems Limited. Built web applications with **React/Next.js**, **Node.js/Express** and **.NET**, designed **RESTful APIs** with JWT authentication and role-based access, and worked with **MySQL**, **PostgreSQL** and **MongoDB**. Strong in **OOP and Data Structures & Algorithms**, comfortable with **Git/GitHub** and Jira, and eager to learn team standards and grow alongside senior developers.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Ag Grid
Backend	Node.js, Express.js, RESTful APIs, .NET, Entity Framework, JWT Authentication, RBAC
Databases	MySQL, PostgreSQL, MongoDB
Languages	JavaScript, Python, C#, C++, SQL
Core Concepts	OOP, Data Structures & Algorithms, Modular & Reusable Architecture, Debugging
Tools & Workflow	Git, GitHub (branching, merging, pull requests), Jira, Docker, AWS (EC2, IAM, VPC)
AI Integration	Claude (Anthropic) API, LLM-powered chatbots, Retrieval-Augmented Generation (RAG)

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Systems Limited (VSI Cloud App Dev)

2025

- Built a full-stack **Student Management System** in **React/Next.js** and **Node.js** with JWT-secured REST APIs and role-based CRUD workflows.
- Created reusable, configurable front-end components to render dynamic data (students, payments), keeping code clean and maintainable.
- Handled large data tables with **Ag Grid Infinite and Server-Side Row Models**, implementing server-side filtering, searching and pagination; compared both approaches to choose the better performance trade-off.
- Secured client-server communication using HTTPS, JWT and Axios.

PROJECTS

Marginalia — AI-Powered PDF Chatbot

React.js, Node.js, MySQL, REST APIs, JWT, Claude API

- Built a full-stack chat app with JWT auth, conversation management (create / rename / delete / search) and real-time AI responses through the Claude API.
- Implemented PDF-grounded Q&A using **RAG with MySQL full-text search**, and added voice responses via the Web Speech API.

CEO Travel & Team Planning Portal

Next.js, .NET, PostgreSQL, REST APIs

- Developed a full-stack portal for executive trips, meetings, team schedules and travel details with role-based access and backend APIs.
- Implemented trip planning, team calendars, flight tracking, JSON export and printable personalized itineraries.

Exe2Vision — Malware Detection System

Python, Deep Learning, React (Vite), APIs

- Built an end-to-end system with a React frontend for .exe uploads, connected to a backend classification API.
- Converted executables to assembly, extracted n-gram features and mapped them to RGB images; trained deep learning models for malware-family classification, with testing, debugging and validation across the pipeline.

EDUCATION

Bachelor of Software Engineering — UET Lahore

2022 – 2026

F.Sc. Pre-Engineering — Punjab Group of Colleges, Multan

2019 – 2021

CERTIFICATIONS

Internship Completion Certificate — Systems Limited (2025) | Online Coding Internship — Artificial Intelligence Community, Pakistan (2023)
